Summary

Science and Technology student at the Federal University of ABC (UFABC), with experience in process automation and digital transformation at Schneider Electric. Skilled in Python, SQL, databases, data analysis and generative artificial intelligence, with an interest in building data-driven solutions and exploring AI applications to solve real-world problems.

Experience

Schneider Electric | Processes & Digital Transformation Intern
Jul/2026 - Present

- Development and management of automations with Power Automate and Microsoft solutions for the Facilities team in South America, covering Brazil, Argentina, Chile, Colombia and Peru.
- Automation of 10 process flows, promoting traceability, standardization and the reduction of manual activities and data loss.
- Process mapping, analysis and standardization, aligning routines across the teams of all five countries.
- Structuring of a process and documentation repository, including file organization and the standardization of flowcharts.

Shopee | Field HR Apprentice
Oct/2025 - Jun/2026

- Generalist HR support for 3 simultaneous logistics operations, providing direct assistance to employees and resolving their day-to-day questions.
- Monitoring, auditing and adjustment of the time-tracking and work schedule system for the operational teams.
- Development of visual and informational materials (presentations and printed notices) for internal communication campaigns.
- Active participation in the annual organizational climate survey and continuous monitoring of engagement, reporting workplace perceptions and feedback to leadership.

Education

Federal University of ABC | Bachelor of Science and Technology
Jun/2025 - Present

ETEC de Sapopemba | Technical Course in Systems Development Integrated with High School Education
Feb/2022 - Dec/2024

ETEC Rocha Mendes | Technical Course in Graphic Design
Jul/2024 - Dec/2025

Additional Courses

- Building AI Agents with Microsoft AI Foundry | SENAI Ary Torres (40h).
- Generative Artificial Intelligence Programming | SENAI Anchieta (40h).
- Python Programming for Data Science | SENAI Ary Torres (60h).
- Databases for Data Science | SENAI Ary Torres (40h).
- Building Databases Using SQL | SENAI Anchieta (120h).
- Building Websites and Digital Platforms | SENAI Mariano Ferraz (120h).
- Fundamentals of Mobile Programming with Kotlin | SENAI Anchieta (120h).

Key Skills

- Artificial Intelligence: generative AI, AI agents and Microsoft AI Foundry.
- Data and Databases: Python, SQL, MySQL, Data Science fundamentals, Excel and Google Sheets.
- Automation and Technology: Microsoft Power Automate, Microsoft tools, Git, GitHub, HTML, CSS and JavaScript.
- Processes: Mapping, standardization, continuous improvement and digital transformation.
- Soft Skills: Analytical thinking, systems thinking, problem solving, organization and fast learning.

Languages

- Spanish (intermediate).
- English (basic).
- Portuguese (native).
